

An Innovative and Affordable Electrostatic Sanitization Process

The ByoPlanet Sanitization Process is a fast, effective and cost efficient way of disinfecting heavily trafficked commercial and industrial spaces such as:

- Airports & Planes
- Animal Care
- Athletic Facilities
- Correctional Facilities
- Cruise Ships
- Education
- Entertainment
- Fitness Clubs & Locker Rooms
- Food Services
- Government
- Health Care
- Homes
- Hotels & Hospitality
- Industrial
- Marine
- Military
- Residential
- Schools
- Transportation
- Truck/Shipping Containers

The ByoPlanet Process = Electrostatic Spraying + ByoPlanet Solution 360

Benefits

- Instead of requiring four different products to clean, disinfect, deodorize, and treat mold, ByoPlanet 360 Solution is ONE product that can do all four jobs.
- The use of the patented electrostatic spray gun allows for more comprehensive and complete coverage of surfaces, requiring less time, less manpower, and less disinfectant.
- A 20 x 20 room takes approximately two minutes to spray.
- The electrostatic sprayer's charged particles reach areas that other application systems or manual labour will miss.
- One gallon of ByoPlanet 360 Solution will cover approximately 10,000 square feet.
