An Innovative and Affordable Electrostatic Sanitization Process

ByoPlanet is a highly effective, hospital grade sanitization and disinfectant process proven in the eradication of harmful bacteria and viruses. It is proven to eliminate allergens, mold, mildew and odors caused by fire, tobacco smoke, urine and mildew.

Mold is found in everyday household environments and contributes to:

- Allergies - asthma and rhinitis
- Upper respiratory tract infection
- Nasal, throat and eye irritation
- Skin irritation
- Sinus congestion
- Chest tightness
- Headaches

Continuous exposure to untreated indoor mycotoxigenic mold can result in more severe symptoms including:

- Cancer
- Neurotoxicity
- Pulmonary injury/hemosiderosis (bleeding)
- Hematologic and immunologic disorders
- Hepatic, endocrine and/or renal toxicities
- Gastrointestinal and/or cardiac conditions

The ByoPlanet Sanitization Process:

- Is safe enough to use around food, humans, and pets.
- Leaves no offensive odours or taste;
- Is non-corrosive, non-toxic and
- Is safe for use on porous and non porous surfaces.

In addition to eliminating the spread of health-threatening pathogens in all types of environments, the ByoPlanet Process also improves air quality, and controls microbial contamination.
